

# DATA CODE REFACTORING AND TRANSFORMATION SERVICES

## Refactor and optimize your current functionality for the Data Cloud

Our Data Code Refactoring and Transformation services enables your organization to utilize your existing data code outputs in the new cloud environment. Using a methodical approach with our automation infrastructure, we transform your current business logic and data usage functionality into the new data cloud destination. The service offering leverages our methodology for rationalization of current outcomes and leverages our automation technology to expedite testing and validation routines as part of the refactoring process so that your organization does not skip a beat in their daily operations.

### About NextPhase.ai:

NextPhase.ai is your trusted partner for cloud data management solutions.

- We deliver a white glove service to handle data ingestion, data validation, improve data usability and data governance.
- Our expertise comes with 400+ cloud certifications and accreditations to support our customer's business challenges and growth
